Publication date: May 5, 2021

Until now, the red printing has tried to indicate in which direction the two components are joined together. In addition, there is also a poka - yoke principle, so that only one assembly direction is possible. Surveys have shown, that this marking is not absolutely necessary and we therefore remove it.

In case of questions or demands do not hesitate to contact the known RAFI contact person.

Please forward this important information also to other responsible departments in your company.

We thank you for the trust you have placed in us and our products and look forward to further cooperation with you.

Best regards,

Product Management
